Instructions

1. **Open Health Care App**
   - I. Is app icon identifiable?

     Yes, but it can't identify in home look
   - II. Do you like theme in this app?

     No, it has poor color choices in the interface. So it is looks like a simplest way.

2. **Go to patient section**
   - I. Can you identify the patient section easily?

     No, that icon look like dinner table. This icon is not suitable for the patient section.
   - II. Do you like the section arrangements in the main menu of the app?

     No, all icons are not giving any proper meaning for its contents.

3. **Add patient**
   - I. Can you find how to add patient easily?

     No, I'm unable to find add button easily. I searched it everywhere in the app.
   - II. Do you like patient adding form layout?

     No, it wants to proper arrangement and labeling system

4. **View details**
   - I. What do you like about patient list arrangement in layout?

     No, There is no any labeling the details so that I can't find the proper details about the patient.
   - II. Can you separate patient in first look?

     Cannot, The recode list of the patients are not separating clearly.

5. **Delete patient**
   - I. Can you find how to delete patient quickly?

     I Cannot identify but after long time duration I can find its delete pop up with long press
   - II. After deleting patient recode auto redirect to main menu, do you like it?

     No, it's must redirect patient list.

Summary:

User is not satisfying about this content. He got a much time to find the delete patient popup. He confused when he look at the patient view. He can't find the patient because the patient list is not labeling. So there should be labeling system in the patient view otherwise he can't view the patients details properly. The main thing is he is not satisfy the user interface color because it is looks like a simplest theme. So user is not satisfy about this app.

Usability and User Experience Issues:

- Icon identify issue
- Theme issue
- Layout issue
- This app not guiding system for user
